

## Company Overview

### **BMT Nigel Gee is one of the world’s leading independent marine design consultancies providing a wide portfolio of services for advanced and specialised vessels**

Based in Southampton, BMT Nigel Gee was formed in 1986 and has been part of the BMT Group since 2001. The company has an outstanding track record in the design of vessels to meet exacting specifications for weight, speed and sea-keeping with a design portfolio that extends to over 150 vessels which have been constructed, ranging in size from 9m to 220m in length and speeds up to 70 knots.

BMT offers a one stop solution for the customer. From early concept design, naval architecture and detailed production design through to survey, construction support and inspection, BMT has the commercial and technical skills and capability to offer a high quality engineering service.

The company has a proven record of managing complex and innovative design briefs from feasibility through to detailed design and, in many cases, production.

State of the art software is used throughout the design process, from CFD and FE analysis during design engineering through to full 3D development of the detail design for structural CNC information and pipework spool piece information.

#### **The company’s range of designs include :**

- High speed and medium speed passenger and car ferries
- Workboats
- Patrol boats
- Specialist vessels
- Offshore vessels
- Commercial ships
- Yachts

BMT Nigel Gee Ltd is accredited to quality standard ISO9001:2001
