

# FlawCheck: Product Details and Specifications

Originally developed as a tool for pipeline operators to simplify integrity and maintenance management programs, **FLAWCHECK** was created by a team of experts in materials and damage assessment. Applying industry input and requirements, enhancements have made it applicable to a wide range of industrial applications.

The team's structural integrity management expertise is based upon three decades of experience in the energy, marine and offshore, transportation, fabrication and manufacturing sectors.

## Analytic Approaches & Methodologies

ASTM E 1049                      BS 7608  
BS 7910                            API RP 579  
PRCI NG 18                      CSA Z662 Appendix K  
Marine classification society rules

- Software Features
- Load characterization, fatigue and failure assessment modules
- Online help and tutorials describing data, calculations and output
- Chart, table and text analysis output to rich text format and text files
- Microsoft Windows 95, 98, NT4.0, 2000 and XP compatible
- Parallel port or USB hardware lock available

## Customization

**FLAWCHECK** can be customized for specific user requirements as it is sold and supported by the program's development team of engineers and programmers.
